## What we can do for you

Bratke Kunststofftechnik GmbH is a mid-sized company specialised in compounding.

Thirty years of experience, committed employees and **our state-of-the-art laboratory** with a technical centre make us a strong partner for entrepreneurs in the plastics industry.

Clients from thirteen countries around the world trust the quality of our product range, but also our innovative development work. We have made a name for ourselves in many industries, such as the automotive and electrical industry, with our individual Bratke compounds.

### We offer

#### Products and services we can offer you:

Individual Bratke compounds	Conductive and sliding plastics
Modification of plastics	
Toll compounding and grinding	In-house testing laboratory*
	In-house technical centre*
High temperature compounds	Counselling and planning for anything related to plastics
Customized compounding	
Environmentally friendly compounds	Plastic granules colouring
High availability due to a stock of about 2,000 tonnes of the most varied technical plastics	

\* You can also rent these facilities for your own tests and experiments! Our team will be on hand with help and advice.

We can provide you with **X**-Granulate<sup>®</sup>  
in **X** varieties for **X** applications!

We are specialised in modifying and refining thermoplastics. We offer our individual Bratke compounds in three different quality standards. After production, you can even have your granules or test specimens undergo any testing you want directly in our in-house laboratory.

## What we truly value:

### Customer focus

Our customers' interests are our top priority. We offer competent counselling services and implement your wishes as quickly as possible. Your deadlines are important to you - which is why we systematically ensure that your projects are carried out immediately.

### Innovation

In order to keep our finger on the pulse of time, we invest significantly in training our employees and bet on leading-edge, mature technology. Optimising our products also plays an important role to us.

Together with our customers, we develop individual plastic solutions for the most varied purposes in our technical centre and have them tested in our laboratory within a narrow time frame.

### Reliability

As we value long-term partnerships, your satisfaction is a huge priority for us. Many of our customers and suppliers have already trusted us for decades. Bratke Kunststofftechnik GmbH has the necessary know-how to live up to high demands while also being flexible enough to react quickly.

## What we do for the environment

A modern world without plastics is unimaginable.

However, this does not only entail profit-yielding times for the plastic processing industry, but also a great deal of responsibility. Crude oil is needed to make plastic. Extracting this valuable resource and the associated climate changes pose entrepreneurs before the challenge of meeting the high demand and at the same time work in an environmentally friendly and sustainable way.

**At Bratke Kunststofftechnik GmbH** we consciously react to these changes and actively contribute to protecting the environment by investing in up-to-date production facilities. By using state-of-the-art technologies, we reduce environmentally harmful emissions and preserve our earth's natural resources.

Recycled plastics no longer are a mere economic factor for producers. The industrial demand for these environmentally friendly materials is on the rise.

Products with a "green" image are also quite fashionable among consumers. With our compounds made of recycled plastics, you too can opt for a green-minded solution. Bratke Kunststofftechnik GmbH offers compounds in different compositions of recycled and original goods. Ask for our economy class products!

**If you opt for our "Economy Class" products, you will actively participate in the protection of our environment and buy a convincing product at a fair price.**

## Why you can trust us

Our highly motivated team is made up of highly qualified employees that are always up to date with the newest technological developments through continuous training. Our team's combined know-how and harmonious collaboration are the cornerstone of our success.

We have our company's certificates renewed on a regular basis and promptly implement revised standards.

Would you like to have further information on our **plastic solutions**? In that case, please do not hesitate to contact us! You will find information **on many of the additional services** Bratke Kunststofftechnik GmbH has to offer in the accompanying information brochure.
